AN INTRODUCTION

Transgenders are part of our society. But still our society does not accept this fact. So they are not open-up themselves in this society. But opportunities given by Government and other sectors are wide. To break their inferiority complex, our team has a way To let them know their strength and their opportunities

**“THE TRANSGENDER
COMMUNITY
DESERVES THE
DIGNITY AND THE
RESPECT THAT MOST
PEOPLE TAKE FOR
GRANTED”**

**A platform
that brings
about digital
activism in a
world.**

SOLUTION:

Our team aims to create an awareness among the transgender community about their opportunity and rights in this judgemental society. We are going to develop a website, that is only for trans people.

THESE ARE THE Contents of our website.

Job-opportunities
In both public and
private.

Scholarship scheme for
education.

Latest updates from
government and in
other websites
regarding the jobs and
others.

Features:

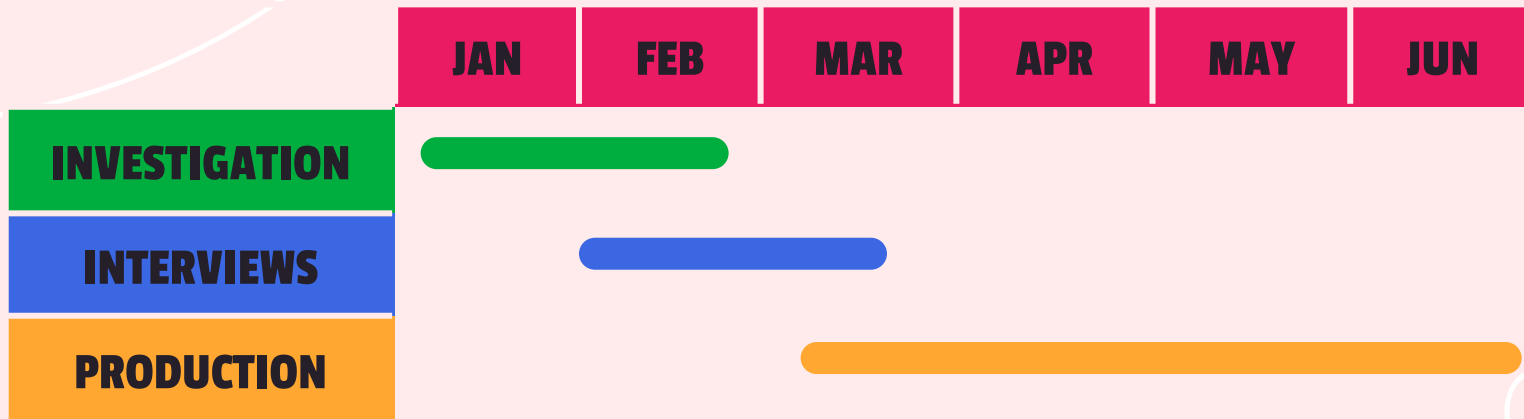

- We have created different sections that contains the lists of all those websites which are creating opportunities for them.
- We also showcased trans people owned business that brings about a ray of hope in the trans community.
- We also have added the story of successful transgender people who have achieved some key milestones in their field

THANK YOU!!

THIS IS A SCHEDULE

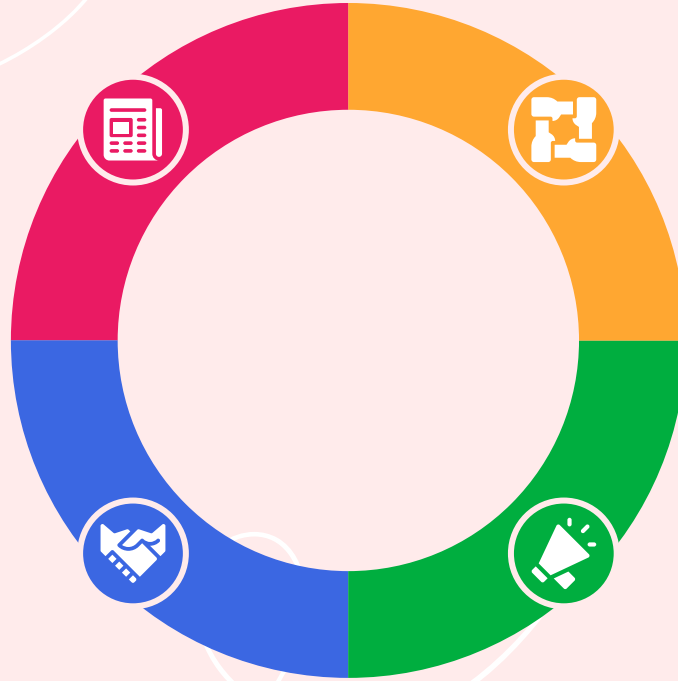

OUR METHODOLOGY

01 RESEARCH

Saturn is composed mostly of hydrogen and also helium

02 DATA STUDY

Mars is full of iron oxide, which gives the planet its reddish cast

ANALYSIS 03

Venus has a beautiful name and is the second planet from the Sun

COMPARISON 04

Mercury is the closest planet to the Sun and the smallest one
